ALEX STOPA

Senior Software Engineer

Annandale, VA • 703.395.2377 • stopa.alex@gmail.com

SUMMARY

Senior Software Engineer with 9+ years of experience building and leading development of full-stack, multi-tenant web and mobile platforms. Proven track record leading small engineering teams, architecting scalable TypeScript/JavaScript systems in React and Node.js, and integrating modern AI tooling (Claude Code) into day-to-day development workflows. Background spans startup product delivery, enterprise consulting, and high-traffic consumer platforms.

EXPERIENCE

Software Engineer, Technical Lead — Slytrunk *May 2021 – Present*

- Serve as technical lead for a team of 4–5 developers, owning architecture and technical direction for a large multi-tenant fan engagement platform serving teams and leagues including the Atlassian Williams F1 Team, the US SailGP Team, and Major League Show Jumping.
- Architected web, native, content management, and backend services in TypeScript, React, React Native, and Node.js delivering a full suite of functionality for existing tenants, along with a streamlined onboarding and deployment model that reduced new-client setup time.
- Mentor engineers on system design, tradeoff analysis, and code quality through hands-on architecture and code review.
- Integrated Claude Code and AI-assisted development workflows into day-to-day engineering practice, helping the team make thoughtful use of AI tooling across the SDLC.
- Contributed to large-scale, high-traffic platforms such as Healthline.com, as well as early-stage startup products like the Trash Panda Food Scanner app, delivering features across web and mobile.

TypeScript, JavaScript, React, React Native, Node.js, Claude Code

Sr. Consultant — Deloitte *March 2019 – March 2021*

- Led development of an AWS-based serverless workforce optimization tool — a distributed, event-driven architecture using React, Python, API Gateway, Lambda, and DynamoDB — with a custom CI/CD pipeline in GitHub Enterprise.
- Led development of a front-end interface connecting to fraud detection APIs, designing REST-based integrations to translate email, IP, and image fraud detection data into meaningful dashboard outputs.
- Led front-end development, database development, and overall application architecture for five internal tools supporting large-scale audit execution planning.
- Managed a development team building a Java-based UI workflow for the first public-facing API at the IRS.

React, Python/Flask, R/RShiny, JavaScript, AWS

Consultant — Deloitte *April 2017 – March 2019*

- Led a team of developers maintaining three AngularJS and SharePoint-based applications: DISCOVER (professional networking platform), DNA (data visualization and analytics), and DASH (request portal).
- Redeveloped the DISCOVER front-end codebase in AngularJS, improving load speed by over 50% versus the previous version; built the UI and permissioning system for DNA using SharePoint authentication with custom permission scripts.

AngularJS, JavaScript, SharePoint

Marketing Associate — FPSA *December 2014 – April 2017*

- Developed and maintained association and trade show websites; created content for social media advertising, newsletters, and email campaigns, increasing web traffic by 97% year over year.

SKILLS

Languages & Frameworks: TypeScript, JavaScript, React, React Native, Node.js, HTML, CSS/Sass, AngularJS

Architecture & Backend: SQL, NoSQL, REST/API design, GraphQL, distributed & event-driven systems, AWS (API Gateway, Lambda, DynamoDB), multi-tenant system design

AI Tooling: Claude Code, AI-assisted development workflows

Tools & Platforms: Git/GitHub, Vercel, Jira, Linux command line, npm

CERTIFICATIONS

ICAgile Certified Agile Practitioner

EDUCATION

University of Louisville | Louisville, KY | 2010 – 2014 • BA, Communications
